

Imagine...your own control tower in the palm of your hand...

As an **Maintenance Supervisor/Manager** or **Duty Foreman** being able to view allocation of all your employees at any time, from anywhere with the use of your smart phone. Not only current allocation, but the forecasted fatigue and scheduled time-off.

As an **employee** an ability to sign-up for any available shifts at any time, from any where with your smart phone. Not only can you sing-up and receive call-outs, but you can also manage your vacation and holiday time.

Operating in several refineries of one of the top petroleum companies within the nation since 2011.

senterlink

Control Tower in the Palm of Your Hand.

senterlink is a comprehensive and automated call-out and maintenance scheduling management system. It is Internet-based and can be used on iPhone and Android mobile platforms. In addition to call-outs and scheduling it provides Fatigue Tracking and Employee Time-Off modules.

Mind the Fatigue

Our latest Fatigue Module utilizes extensive Fatigue Rules which account for triggering notifications to employees and supervisors to ensure that proper rest is given to employees between jobs.

Key Benefits

One-stop view of all employee allocations/assignments at all times.

Increased productivity and efficiency aiding in cost measurement via employment of the Fatigue and Time-Off modules.

Automated and accurate call-outs.

Automated phone messages/text messages which reduce human errors during call-outs.

Mobile access via iPhone and Android.

Customization and replication of various employee rounds.

Convenient **approval process** for Maintenance Supervisor before calling contractors for a job.

Easy and rapid sign-ups via Internet, Interactive Phone System or two-way Text Messaging during sign-up hours.

Security

senterlink system is **fully secured** through the utilization of the latest SSL algorithm.

All personal data such as phone numbers and employee ids fully encrypted utilizing DES encryption algorithm.

All system components located behind a fully secured firewall.

Full implementation of the corporate password policies.

Utilize the Time

Our Time-off Module provides complete vacation, training and other time-off tracking utilizing multiple codes and proper approval processes.

Key clients

Our top clients include refineries in the following areas:

- Detroit
- Texas City
- Galveston
- Garyville
